Products Covered by This Entry

1. Q-close PolyP - Suture, polypropylene monofilament

Functional Description	Q-close PolyP being a monofilament suture is remarkably smooth and easy to handle. It does not have interstices in its structure and being a monofilament suture, has been successfully employed in surgical wounds which could subsequently become infected or contaminated where it can minimize later sinus formation and suture extrusion. It elicits a minimal initial inflammatory reaction in tissues which is followed by gradual encapsulation of the suture by fibrous connective tissue.
